

Fairies Crown Flowers - Instructions

1. Print out the flowers. Cut out as many flowers as you would like to use in your crown. You can print multiple pages if you require more flowers.
2. Using a craft knife, cut along the two grey lines in the center of each flower. Do not allow children to use a craft knife.
3. Measure a ribbon around a child's head, leaving extra at the ends to tie a bow, and cut the ribbon at that length. With the flowers face-down, weave the ribbon through the cut slits in the flowers until all the flowers are strung on the ribbon. Place the flower crown on your child's head and tie it into place.
